COMPANY PROFILE

About Us : Fire Engineering Technology, started with the vision to cater the Hospitals, Hotels, Government sector, and other sectors like Mining and Industries to provide best quality of Fire Safety system with satisfaction.

The company is engaged in Training, Product support and designing activities. It has a history of delivering value to the customers through engineering expertise, efficient operations and Quality systems.

The company has demonstrated its ability to handle projects successfully in the domain of Manufacturing and other sectors. Flexibility to adapt to varying needs of the customers coupled with the extensive knowledge of the industry has ensured delivery of quality products consistently.

Over the years, Fire Engineering has provided its Clients products which are Import Substitutes as well as customized products developed indigenously. The products have been certified for quality, functionality and acceptability by the Regulatory Authorities of the Indian Government. Fire Engineering believes in investing on its infrastructure and newer technologies from time to time.

Product and Services:

1. Fire Suppression System
2. Mining safety products
3. Gas Flooding System
4. Fire Extinguishers
5. Hydrant accessories
6. Detection Systems
7. Installations of Fire Alarm System
8. Installation of Fire Detection System
9. Installation of Suppression system and Flooding Systems
10. AMC
11. Training and Certifications
12. Fire Audit

Deals In : Aut. Distributer “Fire Finder” Automatic Fire Detection and Suppression System, Fire Alarm System, Fire Hydrant System, All Types Extinguishers, AMC, Servicing and Refilling of Fire Extinguishers.

(TIN NO. 07696943498, ST NO. AADFF6834GSD001, PAN NO. AADFF6834G)

MISSION STATEMENT

We are a professional firm providing fire suppression systems, fire protection and life safety services. We encourage our team members' growth through personal and professional development to enhance sustained growth of our company. We engage in active partnerships with our clients to provide design-focused solutions with an unyielding approach toward results. While others are content with technical compliance, we are only satisfied with incident-free outcomes.

OUR HISTORY

FIRE ENGINEERING TECHNOLOGY has been providing inspection, functional testing, and maintenance of fire protection systems to commercial, industrial, government, and mercantile facilities since 2014. We expanded our services by adding special hazards systems and added fire alarm and detection. Most recently, we have added access control systems, fire extinguisher sales and service, and fire protection systems management programs.

OUR CORE VALUES

Fire ENGINEERING TECHNOLOGY team members were asked to provide management with their input to establish our core values. FET team members have developed core values using one word with a description of what each word means to them. FET has made these the cornerstone of our philosophy.

- Safety "Operate in a safe, but timely manner; never work in conditions you deem as unsafe."
"For yourself, your team, and your customer."
- Respect "For team members, customer concerns, and the tools and equipment involved in the task at hand."
- Integrity "Values must be demonstrated in the way you act and the way you insist others behave." "FET has integrity, no team member or customer can compromise it."

Deals In : Aut. Distributer "Fire Finder" Automatic Fire Detection and Suppression System, Fire Alarm System, Fire Hydrant System, All Types Extinguishers, AMC, Servicing and Refilling of Fire Extinguishers.

- Pride “Pride in work and general company ethics.” “Craftsmanship, that I feel good about my services rendered...to meet or exceed NFPA and FET standards.”
- Knowledge “Commitment to enhancing job knowledge.” “FET team members are the professionals in this field, we are not afraid of doing the homework to complete a job correctly.”
- Initiative “A workforce ready, willing, and able to meet new challenges...all members pull together for the good of the company.”
- Innovation “Learn to adapt to change within a company, work with it, not against it, if a company is to grow, there must come changes.” “Look for new opportunities...don’t become stagnant.”

OUR STAFF

Our technicians and staff are among the finest in the industry. Our low employee turnover ensures that your property is in knowledgeable hands.

Field Technicians/Field Specialists complete rigorous in-house training meeting Technician Level I standards within the first year and Technical Level II within the second year. During this training period they work under the direct supervision of a senior technician, additional training is provided through NFPA & FSAI seminars.

Service Technicians must successfully comply the National Fire Protection Association (NFPA) rules for sprinkler fitters. FIRE ENGINEERING TECHNOLOGY is certified with Standard of Indian organization 9001:2015 for 3 Years.

Engineering Technicians (Designers) are Strictly follower of VDS & NFPA rules for Gas Flooding/ Fire Suppression System, Sprinkler System Layout, Fire Alarm Design and Special Hazards Design.

Fire Detection & Alarm System (Suppression) Technicians have received factory training from various manufacturers of fire detection and alarm systems as well as Maintenance method.

ADDITIONAL

- Comprehensive safety program
- Safety incentives for all personnel
- Fleet safety program
- Current Experience Modification Rating (EMR) – consistently below 1.00, which means our worker's compensation claims are low for the industry
- First aid and CPR training – staff and technical
- NFPA 2001 & VDS technical training for Gas Suppression System.
- Fire protection technician training program
- External industry related seminars

Our Clients

- Air Transportation Facilities
- Military Bases
- Warehouses and Material Distribution Centers
- Office Buildings
- Power Generation Facilities
- Correctional Facilities
- Manufacturing and Assembly Operations
- Colleges, Universities and School Systems
- Hospitals and Adult Care Facilities
- Medical Complexes
